word segmentation

今天天气真好
N N N N N N

Parsing. finding downstream task
解析是下游任务

Coreference Resolution 核心指代

Summarization

extractive summarization: binary classifier of each sentence.
abstractive summarization: seq to seq (copy is encouraged)

Machine Translation

(7000 种语言 需要 7000 种 pair)
↓ 2 to 2
语言 to 语言 (机器翻译的 pair)
语言 to 语言
Do we have unsupervised MT? 或者 机器翻译不需要监督
机器翻译

Grammar Error Correction (seq to seq) → 纠错

I am good

Model

I are good

copy is encouraged

↓
我很好

Bolt can have run race → Bolt could have run the race
tokens

Sentiment classification (seq to class)

Stance Detection

(seq to class)

support, denying, querying, commenting (SDSC)

Veracity Prediction (several sequences → class)

Post → model → True/False
Replies uncertain

Natural language Inference (NLI)

Search Engine

Q/A

- Watson:
- (1) Query processing 2500 个问题
 - (2) candidate answer generation
 - (3) candidate answer score
 - (4) confidence merging and rank

unstructured documents \leftarrow Search engine

reading comprehension + retriever

Dialogue: { chatting: cleverbot

9.9 个问题
intent classification
{ slot filling (pos tags)

task-oriented: state \rightarrow policy \rightarrow action

NLG: actions: Greeting
ASK (check in)
ASK (check out) \rightarrow NLG

personality
empathy
knowledge

user input

NLU state tracker

endward state

output

NLG \leftarrow Policy

根据 state, 判断 next step.

custom
phone
check in date 9.9
check out date 9.9+2=9.11
